# DANEL M. TUNGPALAN

Quezon City, Metro Manila | +639674801002 | danelmacujatungpalan@gmail.com

## SUMMARY

Information Technology student with a strong interest in identifying system errors and improving software performance. Experienced in web/application and microcontroller-based projects, with attention to detail and a problem-solving approach to learning. Eager to apply and grow these skills in a professional setting.

## SKILLS

- UI/UX Design & Prototyping (Figma)
- Frontend Development (HTML, CSS)
- Web Application Development (ASP.NET – MVC)
- Development Tools (Visual Studio Code, Microsoft Visual Studio, GitHub, Copilot, Antigravity)
- Microsoft Office Suite (Word, Excel)

## EXPERIENCE

**Software Development Committee** Microsoft Student Community QCU | July 2026- Present
Quality Assurance

- Adapted a test plan and executed 42 test cases across user and admin portals, identifying 18 bugs/issues
- Logged issues via GitHub and proposed UX improvements that were implemented before launch
- Validated API calls and core functionalities prior to website launch

## ACADEMIC PROJECTS

**EcoHydrate: Reverse Vending Machine** Arduino Uno | Multi-Sensor Array | Servo Motor | LCD I2C
Programmer, Prototype Developer

- Designed and programmed EcoHydrate, a reverse vending machine that rewards users with water for recycling plastic bottles, using the bottle as a token in place of currency
- Implemented a capacitive sensor to verify bottle material, an IR sensor to detect object insertion, and an ultrasonic sensor to monitor bin capacity
- Added start/stop button controls to manage the dispensing process, with real-time I2C LCD feedback showing material verification and timed dispensing progress

**Celluxe: E-Commerce Website** ASP.NET-MVC | MySQL Workbench | PayMongo API
Programmer

- Developed the admin dashboard with analytics and management tools for products, orders, inventory, and users
- Built the guest and post-login user landing pages, along with a review feature restricted to verified purchasers of the specific product
- Implemented SMTP-based email verification for account activation, password resets, and transaction confirmation, along with PayMongo API integration for payment processing

## EDUCATION

**Quezon City University** **August 2023 - Present**
*Bachelor of Science in Information Technology* 673 Quirino Highway, San Bartolome, Novaliches, QC
